1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a switching power conversion circuit, classified in class 363, subclass 24.
- II. Claim 10, drawn to a saturable transformer, classified in class 336, subclass 178.

2. The inventions are distinct, each from the other because inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a switching power conversion circuit that does not require the use of a transformer, much less a saturable transformer, and invention II has separate utility such as a saturable transformer in any circuit requiring one or even as a stand alone saturable transformer. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter and the search required for invention I is not required for invention II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Morton Rosenberg on January 20, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey L. Sterrett whose telephone number is (571) 272-2085. The examiner can normally be reached on Monday-Thursday & 8:00am-5:00pm.
